

In the Specification:

Please replace the paragraph beginning at page 3, line 4 with the following amended paragraph:

In an embodiment of the invention, one of the colored pigments is a blue pigment, optionally, having a color index pigment blue 15.3. Optionally, the blue pigment has a color index pigment blue 15.4. Optionally, the blue pigment is a ~~Phthalocyanine~~ Phthalocyanine pigment.

Please replace the paragraph beginning at page 7, line 15 with the following amended paragraph:

In general, substantially lightfast pigment groups include Benzimidazolone pigments commercially available in various hues of the colors Yellow, Orange, and Red; Isoindolinone and Isoindoline pigments commercially available in various hues of the colors Yellow, Orange, Brown and Red; ~~Phthalocyanine~~ Phthalocyanine pigments commercially available in various hues of Blue and Green; Perylene and Perinone pigments commercially available in various shades of Orange 20 and Red; Diketopyrrolopyrrole (DPP) pigments commercially available in shades of Orange and Red, Thioindigo pigments available in various hues of Red and Dioxazine pigments available in various hues of Violet. In some embodiments of the invention inorganic pigments, such as Iron Oxide, Lead Chromate, Chromium Oxide, Ultramarine, and many others.
